

PRESS RELEASE

Atmos Energy Pipe Replacement Projects Begin in Platteville *System Upgrades Increase Safety & Reliability of Natural Gas Service*

Platteville, Colo. (Aug 26, 2019) –Atmos Energy is investing millions of dollars to replace aging infrastructure throughout Colorado to further increase the safety and reliability of its natural gas delivery system. Beginning Tuesday, August 27, 2019, these pipe replacement efforts will take place in Platteville, Colorado.

“Over the next several weeks, we will be upgrading natural gas pipelines in the town of Platteville,” said Kurtis Paradisa, Atmos Energy Public Affairs Manager. “While our current system is safe and has performed well, we are replacing aging pipe with state-of-the-art materials.”

Platteville is home to more than 1000 customers served by Atmos Energy in Colorado. This spring and into the fall, residents can expect to see highly-trained work crews replacing the natural gas mains and service lines that connect to customers’ meters.

“We are working closely with Platteville town officials and our local fire department to minimize any disruption that may accompany these upgrades,” said Paradisa. “In an effort to keep our customers informed, Atmos Energy crews will place a door tag at your home before work begins and place construction signs throughout your neighborhood.”

Atmos Energy’s pipe replacement projects are scheduled to last 5-7 weeks, concluding in October, 2019. For more information and to view a map of the projects, visit: www.atmosenergy.com/colorado, or call 1-888-286-6700.

Natural Gas Safety and You

One of the best ways to detect a natural gas leak is through your sense of smell. We add an odorant to our gas that makes it smell like rotten-eggs. We do this as a safety precaution. If you ever smell gas – leave your home immediately and from a safe distance call 911 and our emergency number 1-866-322-8667.

About Atmos Energy

Atmos Energy Corporation, headquartered in Dallas, is the country's largest, fully-regulated, natural-gas-only distributor, serving over three million natural gas distribution customers in over 1,400 communities in eight states from the Blue Ridge Mountains in the East to the Rocky Mountains in the West. Atmos Energy also manages company-owned natural gas pipeline and storage assets, including one of the largest intrastate natural gas pipeline systems in Texas. For more information, visit www.atmosenergy.com. Atmos Energy can also be accessed through social media platforms such as [Facebook](#), [Twitter](#), [Instagram](#), and [YouTube](#).

###

We're investing in a safe, reliable natural gas system. **From the ground up.**

Project Details

Where is work being done?

Grand Avenue south to Goodrich Avenue and from River Road east to Division Street. A small portion of the project will include the corner of Vasquez Boulevard and Elizabeth Avenue.

See reverse for map.

Dates:

September-October

How will this impact me?

Before work begins in your neighborhood, we will place a door tag at your home. Once construction is started, it could cause a temporary disruption to your natural gas service. If this happens, we will talk to you or leave a door tag with next steps to restore service.

Why are you replacing pipelines?

We are upgrading aging infrastructure with newer pipe to increase the safety and reliability of our system. The new gas lines are more modern, durable, and meet all current safety requirements.

Investing in Safety for You

Atmos Energy is committed to being the safest natural gas provider in the nation and in Colorado. That's why we're investing millions of dollars each year in system upgrades.

In 2019, our efforts in Platteville will focus on replacing the natural gas pipelines located in city streets, including the gas line that connects to your natural gas meter.

Natural Gas Pipeline Upgrades

When upgrading our natural gas lines, you'll see us working in streets and yards. This may include cutting holes in streets and driveways, plus digging in some yards. While work is going on, we will make temporary repairs to yards and sidewalks. When the work is complete, we will make arrangements with you to restore affected areas to their previous condition.

We will work closely with the Town of Platteville to limit the impact to you and other residents. We appreciate your patience as we work to finish the project safely and as quickly as possible.
